

Dog Collar (COLLAR) Community Paper (CP) 1.0

Prepared for: #COLLARCREW HODL

Prepared by: Morpheus, Visionary Architect

September 16, 2021

Proposal number: 01001011 01110101 01101110 01100111 00100000 01000110 01110101

PURPOSE

Introduction

Dog Collar (COLLAR) is a stand-alone project and a fully community-organized token experience.

The fundamentals of COLLAR are, and always have been, the community itself. The community infuses purpose, utility, and direction to COLLAR. The community holds the intrinsic value, not the token. Tokens are simply an object to focus the power, talent, and tremendous ability of the community.

To that end, there will be no hidden roadmap, secret plans, or other opportunities for “insiders” to buy. All future developments, roadmaps, and opportunities will be planned in the open with input from all who wish to contribute. To our future -- together.

Morpheus

History

Like many others, COLLAR is an ERC-20 token that began its life as someone’s experiment or training exercise. COLLAR, simplistic in its code and born out of an apparent coding tutorial, is as fundamental a token as one can expect. After creation, COLLAR was left cast aside and overshadowed for weeks by other projects. As the second token to be launched on ShibaSwap, (with half the supply burned to the Shib token contract), community members decided to revitalize this underdog and prove gimmicks, fancy code, and “to the moon” marketing pushes are not necessary.

50% of Supply Burned to SHIB Contract

Half of the total supply of Dog Collar was burned to the “Shiba Inu: SHIB Token” contract within a few hours of the Ryoshi’s Vision token. (Etherscan linked.)

 [See the Burn](#) 

50% of Supply Locked as Liquidity on ShibaSwap

The remaining half of Dog Collar supply was locked as liquidity to ShibaSwap and the SSLP tokens burned to the “Shiba Inu: SHIB Token” contract.

Objective

The objective of the COLLAR CP version 1.0 is to cement the mission and vision for self-governance. Once adopted by a community via a public vote, the #collarcrew may have discussions via our official Discord server to see if the community has enough members with the same interests to move an idea forward for a formal vote. If passed, then the CP would be updated to reflect the communities wishes.

Decentralized Autonomous Organization (DAO)

DeFi inspired the foundation of the COLLAR DAO not to have a single person or institution that has more control. Our focus and attention to detail empower the #collarcrew to have meaningful oversight of the COLLAR governance.

We invite and encourage the current and future #collarcrew to join the COLLAR DAO at: <https://snapshot.org/#/dogcollar.eth> and connect with other members via our official Discord server <https://discord.gg/collarcrew>.

Voting

The following rules have been set up in the interest of providing meaningful community oversight. Future voting rule changes will be from the outcome of public votes under the following conditions.

- New Proposal:
 - A COLLAR HODL with greater than 5,000,000,000,000 (5 Trillion) in ONE wallet that HODL can submit a new proposal for consideration.
 - Multi-signature donation wallet signers may submit a new proposal without the 5,000,000,000,000 (5 Trillion) requirement. This additional privilege is not designed for self-benefit but allows for straw proposals to help narrow down options when clarity is needed from the community on an action item.
- Member Voting: Any COLLAR HODL with greater than 100,000,000,000 (100 Billion) in ONE wallet will be able to cast votes.
 - An anti-whale voting feature has been added to the DAO and will be adjusted and reported over time.
 - A #collarcrew member wallet will lose voting rights if it is found that the member acts in bad faith.

Robert's Rules of Order for Conflict Resolution

Robert's Rules of Order (RRoO). The parliamentary procedure is a set of rules for conduct at meetings that allow everyone to be heard and make decisions without confusion. Parliamentary procedure is essential because it's a time-tested method of conducting business at meetings and public gatherings. In most cases, we do not need to utilize RRoO as we are a respectful #collarcrew who seeks input from all. RRoO shines when we find that we have a challenging topic with many different points of view; in those situations, we will utilize the RRoO framework to find confesses and speak with one voice after the public vote, even if we would have hoped for a different outcome.

Multi-signature Donation Wallet Oversight

The #collarcrew selected five (5) community members to provide an extra layer of protection of our donated funds located at 0x23Aa05DDF32F6D20AD0d3FcFBb7F5E05a4445AF8

On September 3, 2021 the following people were installed as our founding multi-signature wallet signers are; Position #1 Morpheus, position #2 Jared Dunn, position #3 Mr. Johnny Five, position #4 Nemo, position #5 LShtivi. The multi-signature wallet signers are NOT granted additional authority over the Dog Collar (COLLAR) project.

Position terms. These positions are for two (2) year terms. With the best practice of not having 100% oversight turnover, we have created a staggered process to provide the best protection to our community. Position #1 and #3 will be up for election by December 31, 2022, position #2, #4 and #5 will be up for election by December 31, 2023.

Sixty (60) days before the end of any term list above, #collarcrew members who have HODL COLLAR longer than ninety (90) days may be considered a signer of the multi-signature donation wallet. No later than 20 days before the official vote, each person who wishes to be considered must declare their interest and be seconded by a Discord member holding the Discord Server Title of Logos, Nebuchadnezzar, or Admin. Thirty (30) days before the end of the current term, a public vote will be conducted where all properly nominated individuals will be voted on. The person with the most votes for the position will be seated after January 1st following the election cycle, unless the seat being installed is a vacant seat.

No later than January 10th of each year, the #collarcrew community elected multi-signature signers will convene a meeting for the purpose of self appointing ONE (1) multi-signature signer to the position of DAO Admin. This new multi-signature signer DAO Admin will be added to the prior years' multi-signature signer DAO Admins with the additional authority to initiate a new COLLAR Proposals without the requirement of holding 5,000,000,000,000 (5t) COLLAR. People who have hold or held the title of multi-signature signer DAO Admin may be asked to facilitate such a meeting for the purpose adhering to RRoO.

Project Funding

Our project will be funded by slowly selling some of our tokens from our multi-signature donation wallet through the upcoming months. This means that there won't be dangerous price fluctuations that make the value of our token crash. The selling of tokens is necessary because a lot of the bigger exchanges demand deposits of either BTC, ETH, or fiat currency to get listed on their exchange. Other funds will be used for marketing campaigns to widen our reach. All of the transactions will be transparent and communicated to the #collarcrew.

Roadmap in progress

Once COLLAR CP 1.0 is adopted, then the work of identifying what the communities' interests are and creating verbiage to be debated on Discord, then to bring the well thought motions to the floor for a vote by the COLLAR HODL. The following items are only the start for the #collarcrew future work to evolve the living document called Dog Collar CP.

- | | | | |
|--------------------------|-----------------------|----------------------------|------------------------------|
| • Increasing COLLAR HODL | • identifying utility | • Identifying tokenomics | • Multiple exchange listings |
| • Identifying charities | • Grow community | • Identifying partnerships | • Continual self-improvement |

Legal Considerations, Risks and Disclaimer

This is a living document, and information is up to date at the time of publishing. Please note information herein does not constitute investment advice, financial advice, trading advice, or any other sort of advice, and you should not treat any of the content as such.

The Dog Collar (COLLAR) team suggests you conduct your due diligence and consult your financial advisor before making any investment decisions. By purchasing any COLLAR product, you agree that you are not purchasing a security or investment, and you agree to hold the team harmless and not liable for any losses or taxes you may incur. You also agree that the team is presenting the product(s) "as is" and is not required to provide any support or services. You should have no expectation of any form from the COLLAR and its team. Although COLLAR is a community-driven DeFi and not a registered digital currency, the team strongly recommends that citizens in areas with government bans on Crypto do not purchase it because the item cannot ensure compliance with your territories regulations. Always make sure that you are in compliance with your local laws and regulations before you make any purchase.
